Installation

Billr plugin for WooCommerce can be installed in three different ways:

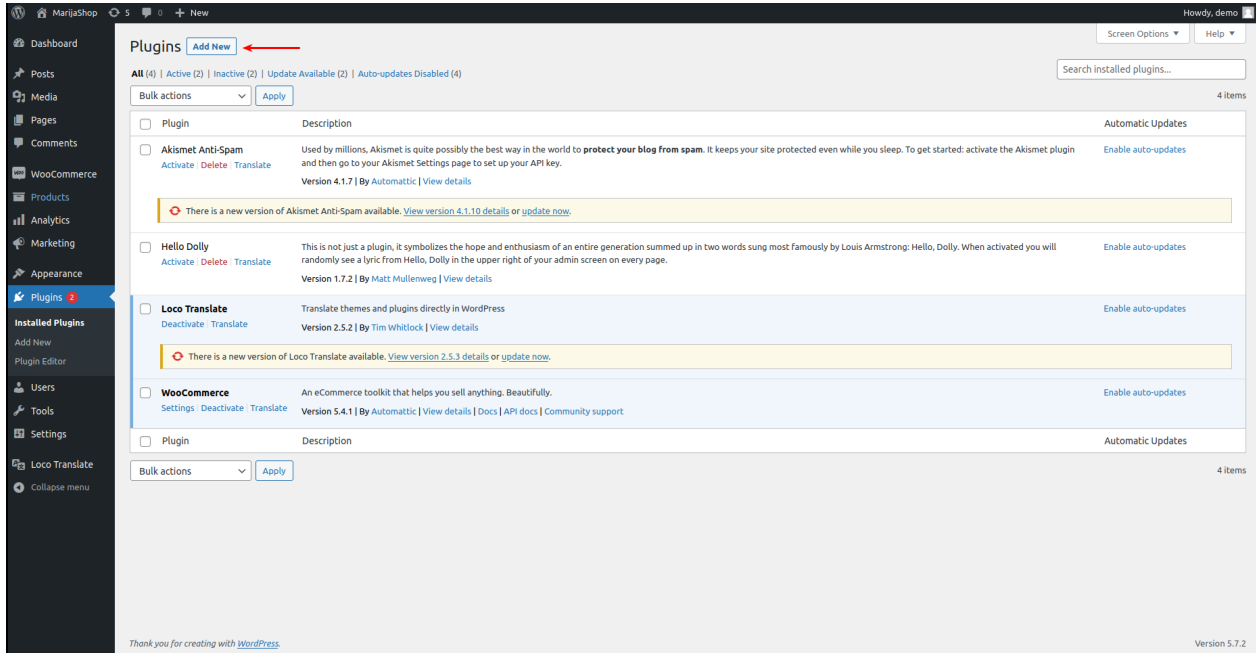

- Uploading the plugin .zip archive through the WordPress admin panel
- Directly from WordPress.org
- Manually

Uploading the plugin .zip archive

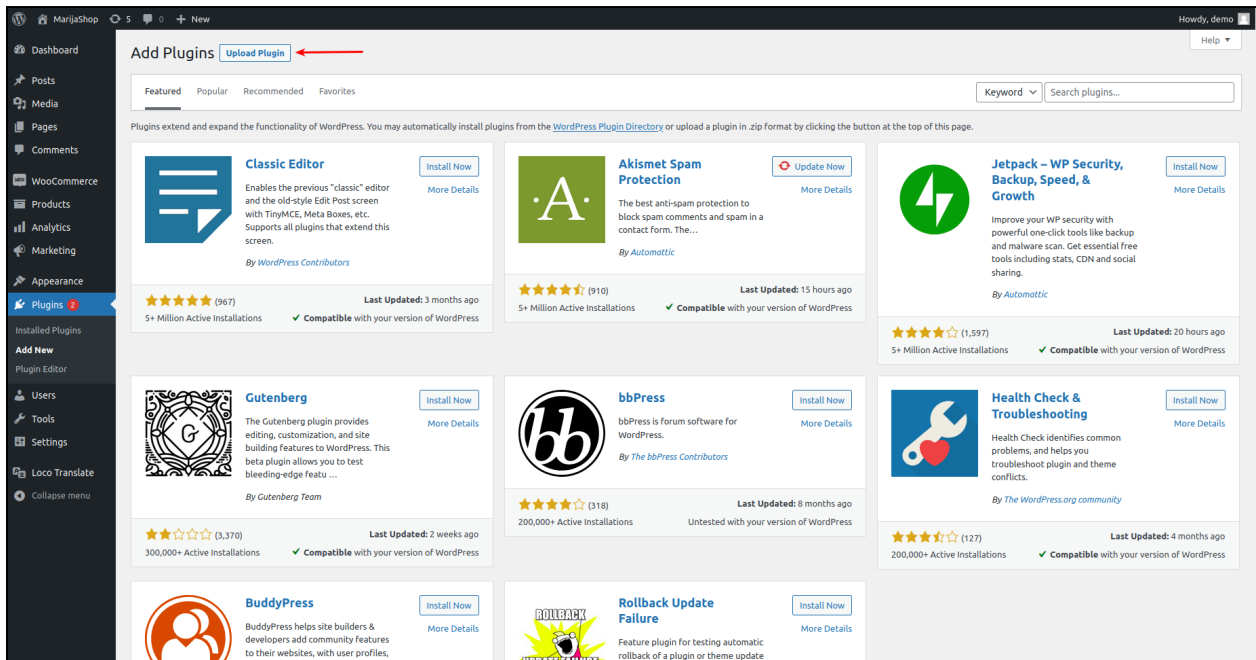

Billr WooCommerce plugin can be installed using .zip archive through the **Plugins** menu item.

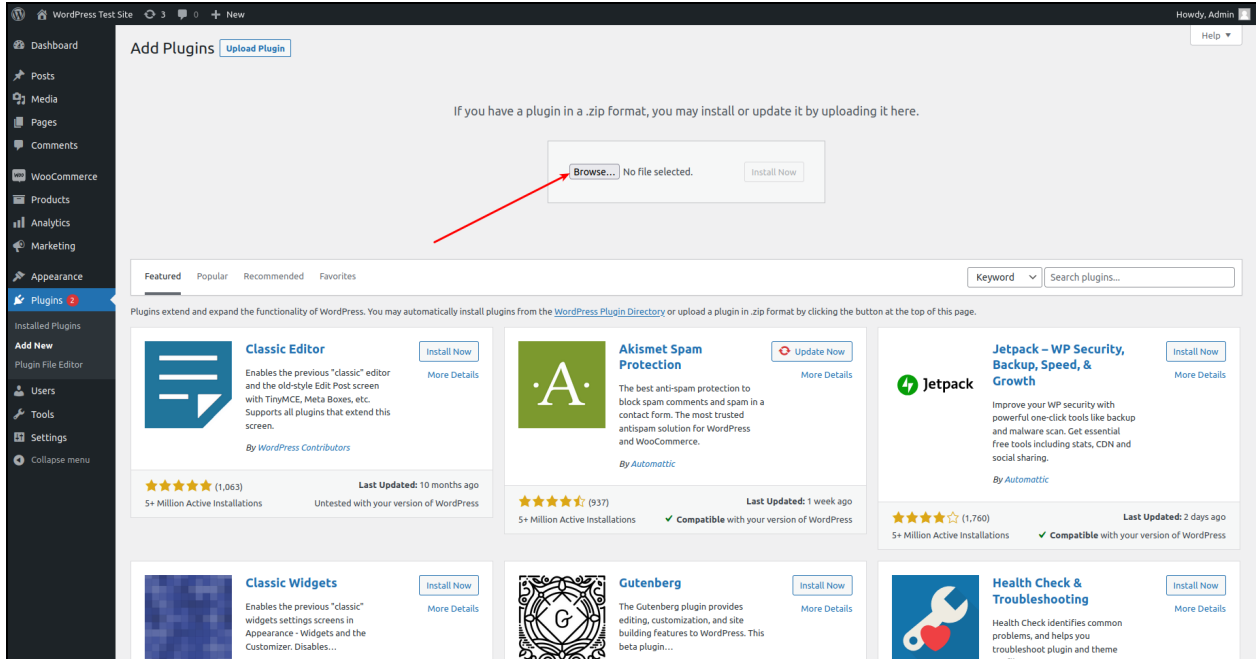

Then, by clicking on the **Add new** button and the **Upload Plugin** button.

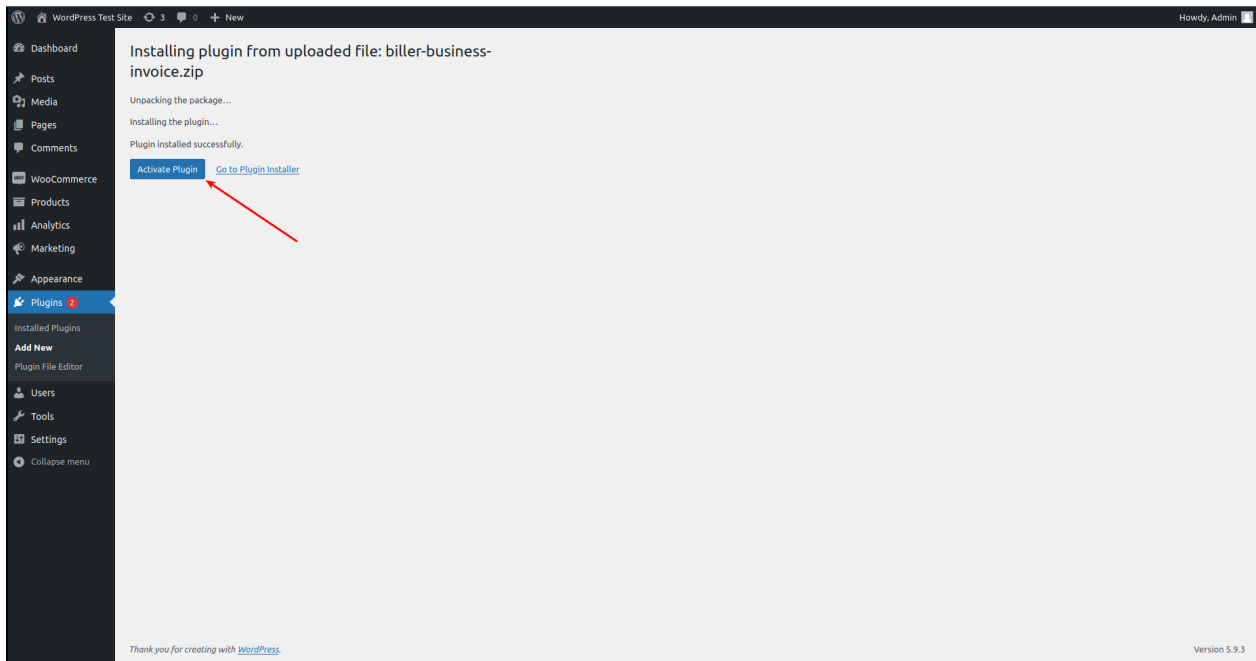

This will open a page for adding plugins, where you can click on the **Upload Plugin** button.

This will prompt you with a file selector step. Click on the **Browse** button to browse your file system and find the plugin ZIP archive.

Once uploaded, the plugin will be installed and you just need to activate it by clicking on the **Activate** button.

Marketplace installation

Billar WooCommerce plugin can be installed through [WordPress plugins](#).

Details | Reviews | Installation | Support | Development

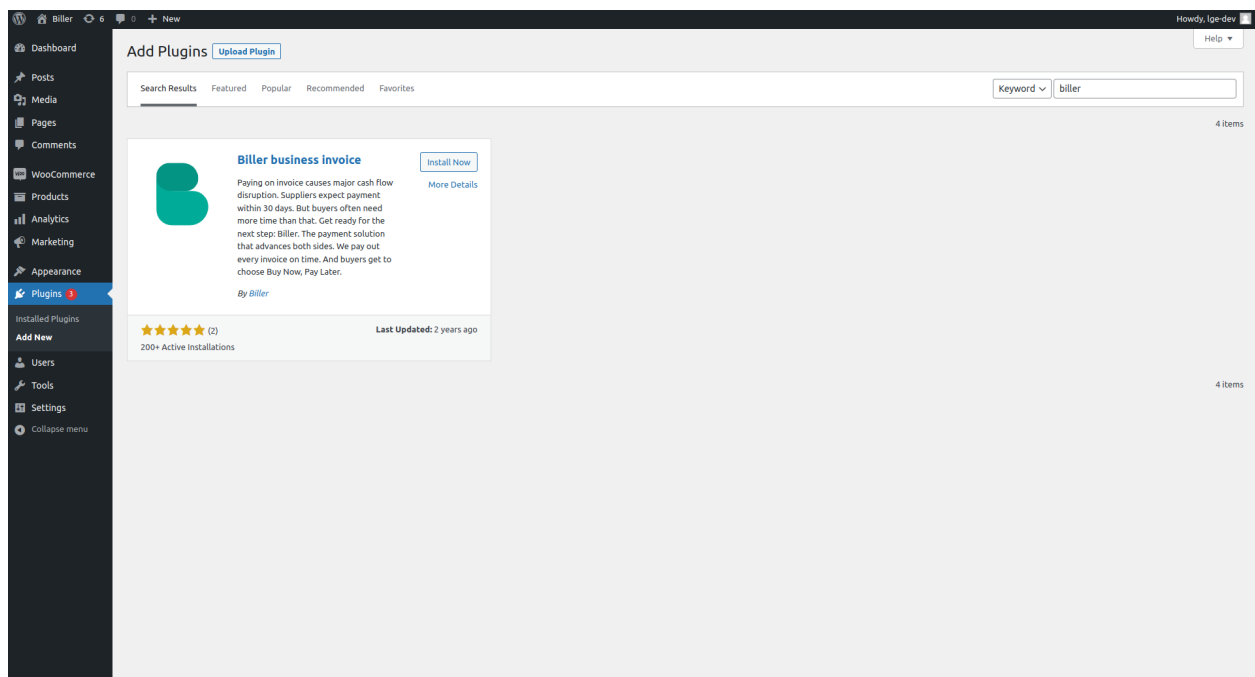

Description

THE MOST POPULAR WORDPRESS PLUGIN FOR JUST ABOUT EVERYTHING.

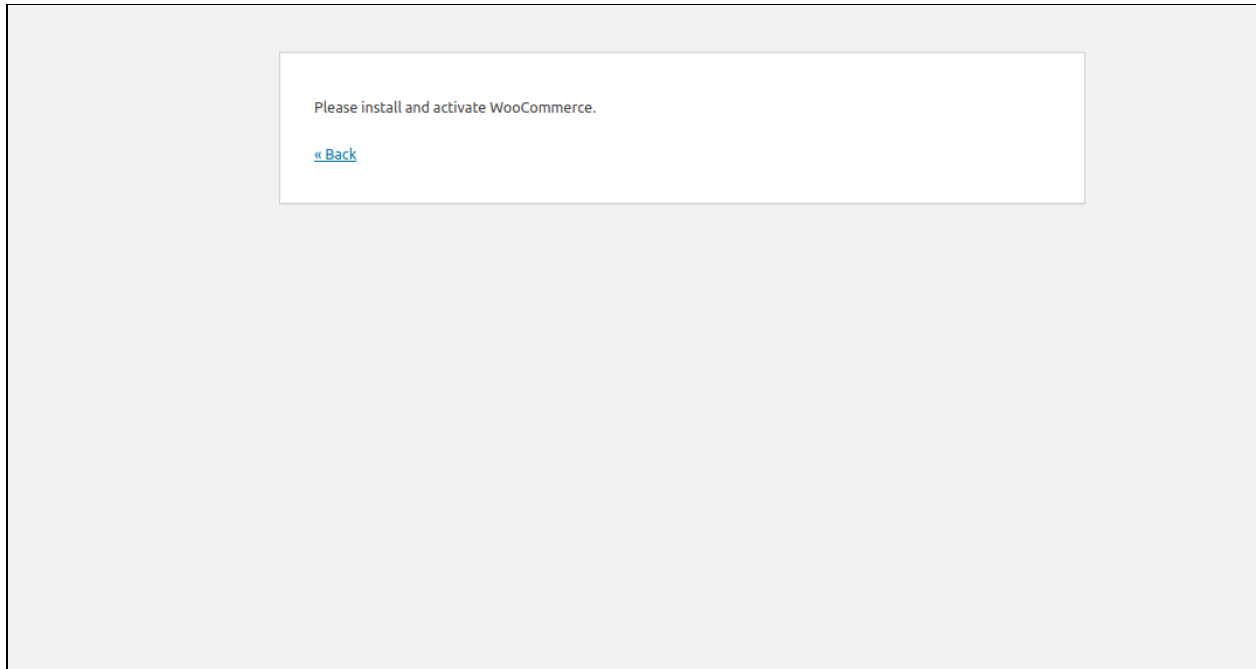

Paying on invoice causes major cash flow disruption. Suppliers expect payment within 30 days. But buyers often need more time than that. Get ready for the next step: Billar. The payment solution that advances both sides. We pay out every invoice on time. And buyers get to choose Buy Now, Pay Later.

Version:	1.0.0
Last updated:	7 days ago
Active installations:	200+
WordPress Version:	5.9 or higher
Tested up to:	6.0
PHP Version:	5.6 or higher

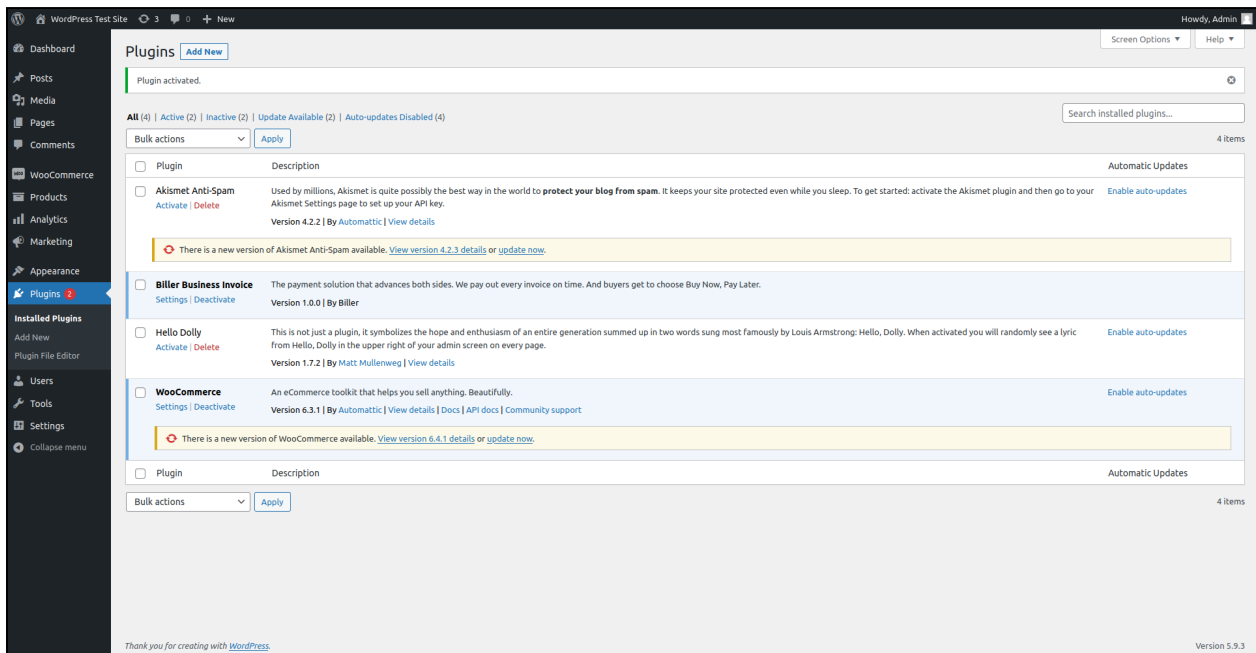

Alternatively, the plugin can be installed directly from the plugin page in the WordPress administration area by going to **Plugins > Add New** and searching for "Biller".

The Biller plugin requires the WooCommerce plugin to be installed on the WordPress website. If the WooCommerce plugin is not installed and activated, the plugin will not be available for use.

Once installed and activated, the plugin will be visible on the plugins page.

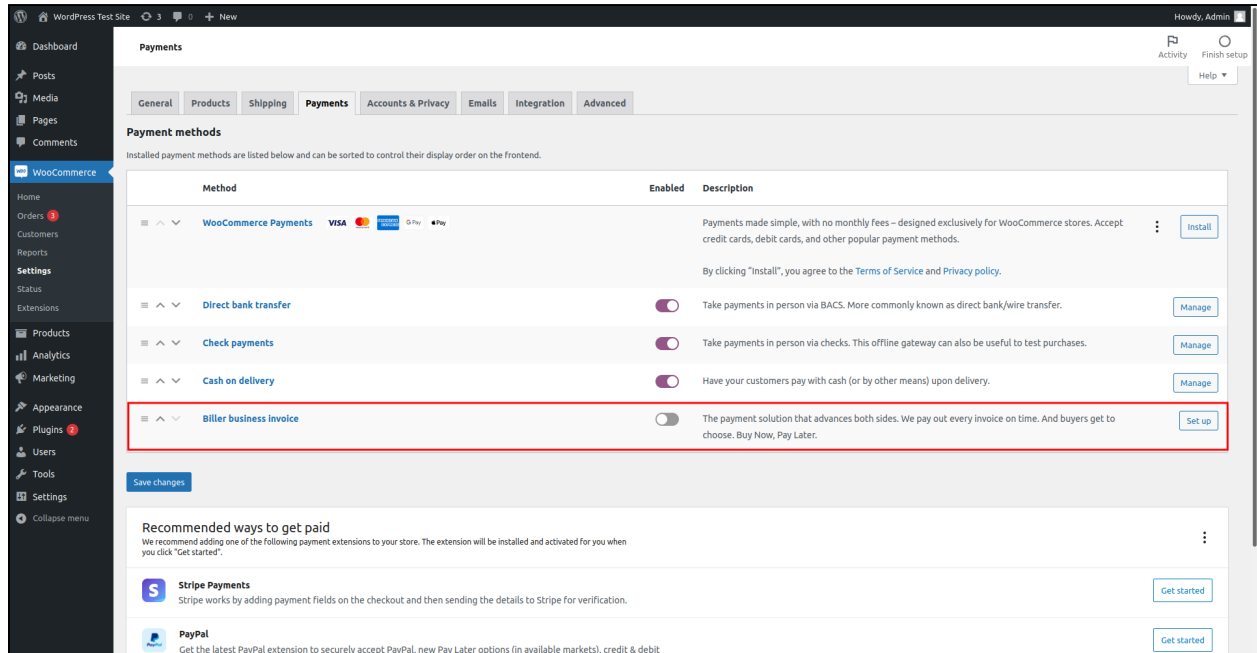

Manually via S(FTP)

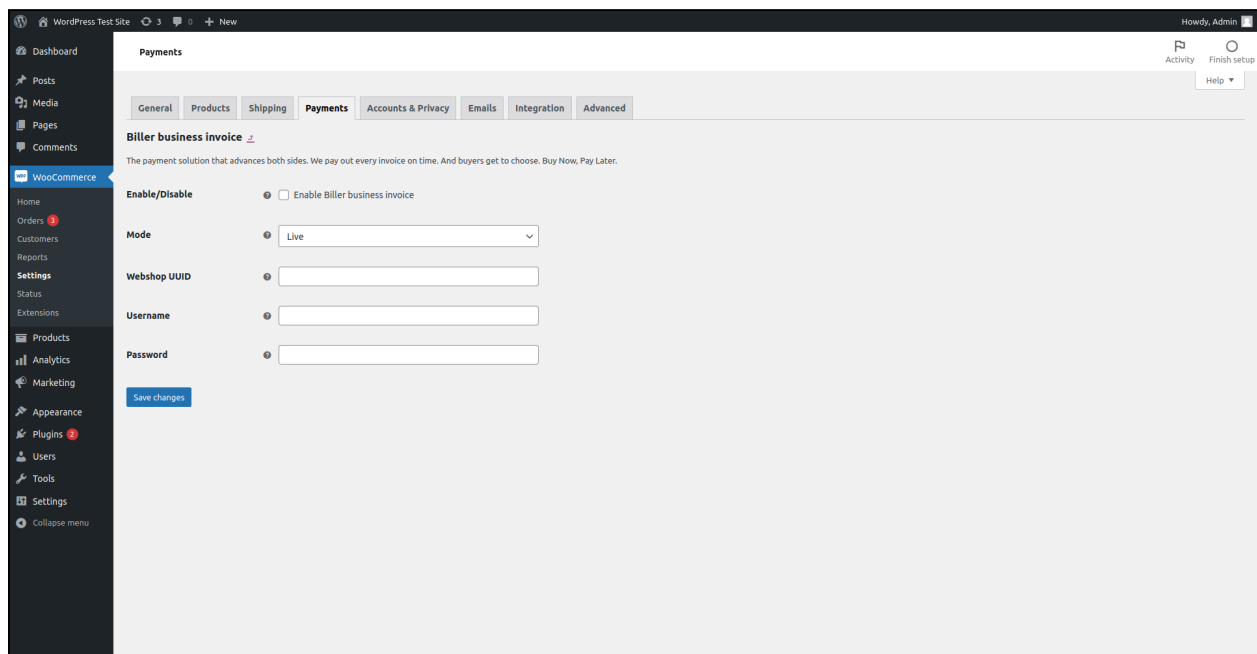

Biller plugin source code must be copied into WordPress **/wp-content/plugins/** folder using (S)FTP access. After uploading the Biller plugin into the plugin will be available in the Plugins section of the WordPress admin panel. Click on **Activate** to activate the Biller plugin.

Payment method configuration

After activating the plugin, the Biller business invoice payment method will be available among other payment methods in WooCommerce settings.

Clicking on the “Set up” button will open up a configuration page.

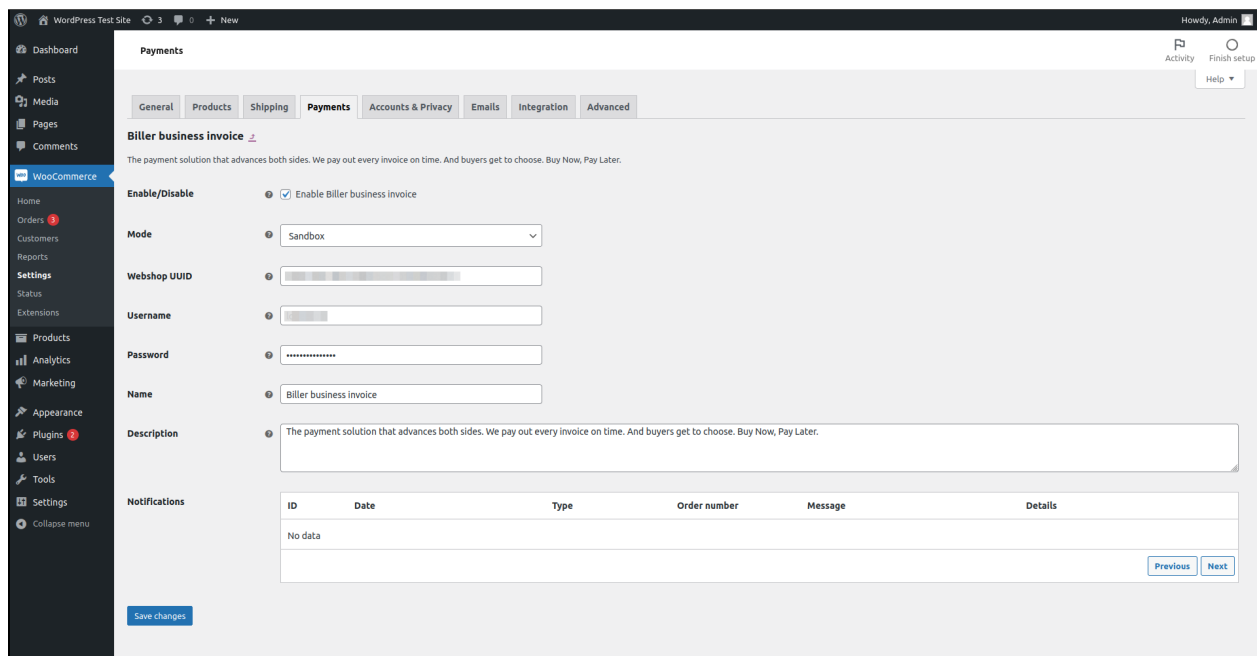

This initial configuration page contains the following configurations:

- **Enable/Disable** - checkbox that if checked will enable the Biller business voice payment method and show it to customers on the checkout page
- **Mode** - options field that allows merchants to choose either live or sandbox mode (used for testing purposes)
- **Webshop UUID** - unique identifier of the Webshop from Biller
- **Username** - Biller seller username
- **Password** - Biller seller password

Last three fields are required for establishing a connection with the Biller API and starting to use the Biller business invoice payment method.

Once a successful connection has been established, additional fields will be available for configuration.

These configurations are:

- **Name** - controls the title which the user sees during checkout.
- **Description** - payment method description that the customer will see on your checkout.

There is also a notification hub that displays all significant events concerning the Biller payment method happening in the system that possibly require the merchant's attention (or that are simply informative). The plugin will log all of those events to the notification hub and display them on this page.

Checkout flow

After activating and configuring the Biller business invoice payment method, it will be available for the shop customers on the checkout page.

The Biller business invoice will be displayed on the checkout page only in the following cases:

- Checkout billing country is either Netherlands or Belgium
- Checkout currency is EUR, DKK, or GBP

If both of those conditions are met, the Biller business invoice will be offered to the customer as a payment option on the checkout.

The screenshot displays a checkout page with the following elements:

- Country / Region:** A dropdown menu showing "Netherlands".
- Street address:** A text input field containing "Prins Hendrikkade 108".
- Apartment, suite, unit, etc. (optional):** An empty text input field.
- Postcode / ZIP:** A text input field containing "1011 AK".
- Town / City:** A text input field containing "Amsterdam".
- Phone:** A text input field containing "123456789".
- Email address:** A text input field with a blurred email address.
- Additional information:** A section titled "Order notes (optional)" with a text input field containing "Notes about your order, e.g. special notes for delivery."
- Summary:** A table showing "Subtotal 45,00 €" and "Total 45,00 €".
- Payment Methods:** A list of options: "Direct bank transfer" (selected), "Check payments", "Cash on delivery", and "Biller business invoice" (highlighted with a red box). The "Biller business invoice" option includes the Biller logo.
- Archives:** A section titled "Archives" with a link for "March 2022".
- Categories:** A section titled "Categories" with a link for "Uncategorized".
- Disclaimer:** A text block stating: "Your personal data will be used to process your order, support your experience throughout this website, and for other purposes described in our [privacy policy](#)."
- Place order:** A black button with white text.

Clicking on this payment method will reveal additional fields where the customer can provide additional information.

The screenshot shows a checkout form with the following sections:

- Street address ***: Prins Hendrikkade 108
- Apartment, suite, unit, etc. (optional)**: (empty)
- Postcode / ZIP ***: 1011 AK
- Town / City ***: Amsterdam
- Phone ***: 123456789
- Email address ***: (empty)
- Additional information**: Order notes (optional) - Notes about your order, e.g. special notes for delivery.
- Payment Methods**:
 - Direct bank transfer
 - Check payments
 - Cash on delivery
 - Biller business invoice** (highlighted with a red box) - Includes the Biller logo and a description: "The payment solution that advances both sides. We pay out every invoice on time. And buyers get to choose. Buy Now, Pay Later." Below this are fields for "Company name*", "Registration number (recommended)", and "VAT number (optional)".
- Categories**: Uncategorized
- Total**: €5,000
- Privacy Notice**: Your personal data will be used to process your order, support your experience throughout this website, and for other purposes described in our [privacy policy](#).
- Place order** button

These additional fields are:

- **Company name (Required)**
- **Registration number**
- **VAT number**

Once the customer enters this information and places the order with the Biller business invoice payment method, he/she will be taken to the external page to complete the payment.

Once the payment has been completed, the customer will be redirected back to the WooCommerce storefront with the order confirmation page.

Order management

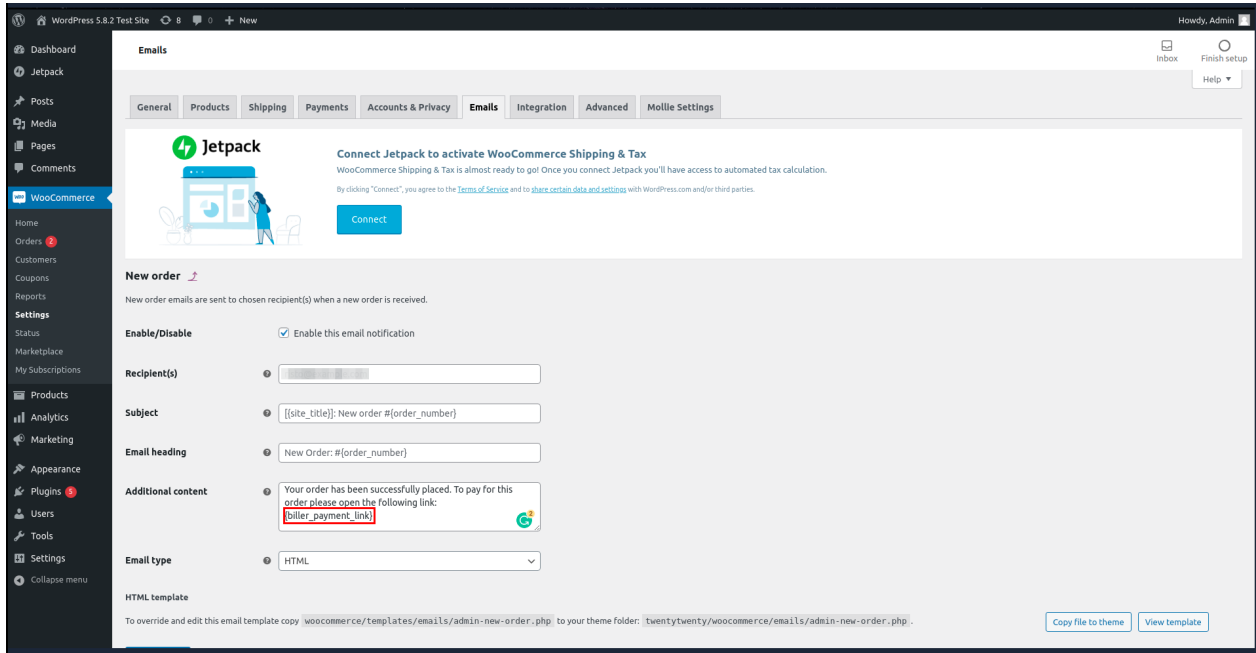

All orders paid using the Biller business invoice will have their order management screen in WooCommerce extended with additional actions for the Biller business invoice.

Payment link

In case the customer has not completed the payment process on the Biller side, this extended section will only contain a payment link that you can send to the customer to complete the payment.

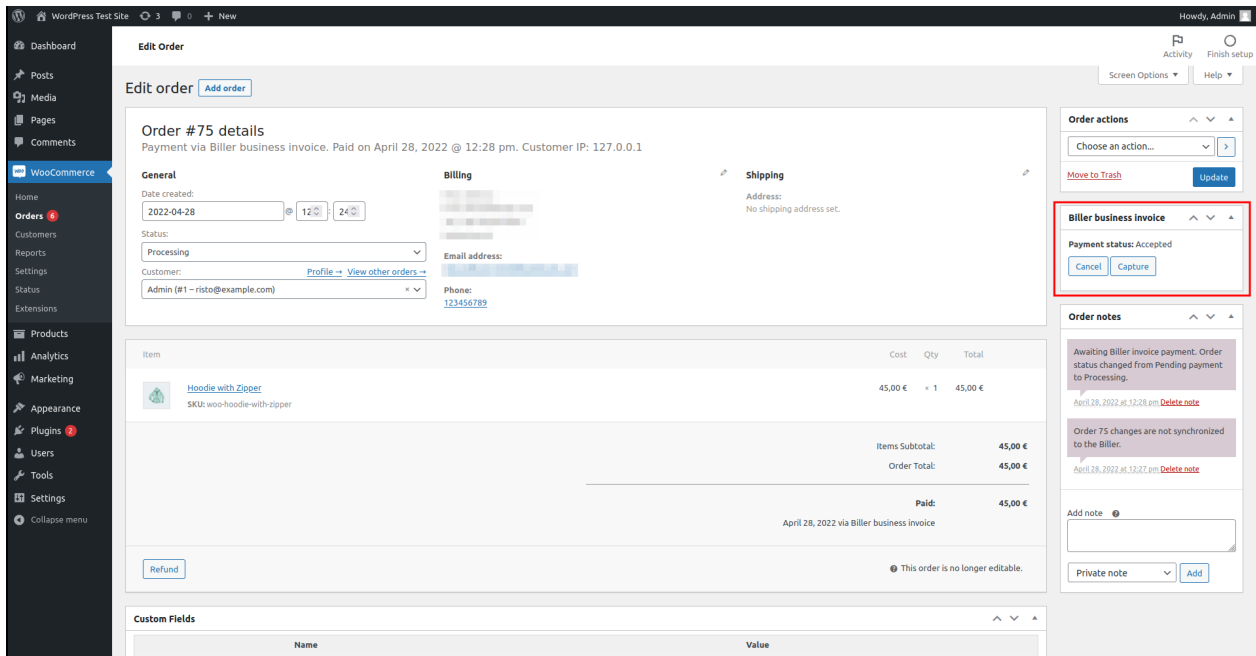

You can add this payment link to various email templates in WooCommerce by navigating to **WooCommerce > Settings > Emails**, selecting the desired email template, and adding a `{biller_payment_link}` email variable to it.

Capture and cancel

In case the payment has been completed for the order paid with Biller business invoice, this box displays the current payment status on Biller as well as two additional actions, **Cancel** and **Capture**.

You can also cancel the order using the native mechanism in WooCommerce by transitioning the order into the Cancelled status, which will also be propagated to Biller.

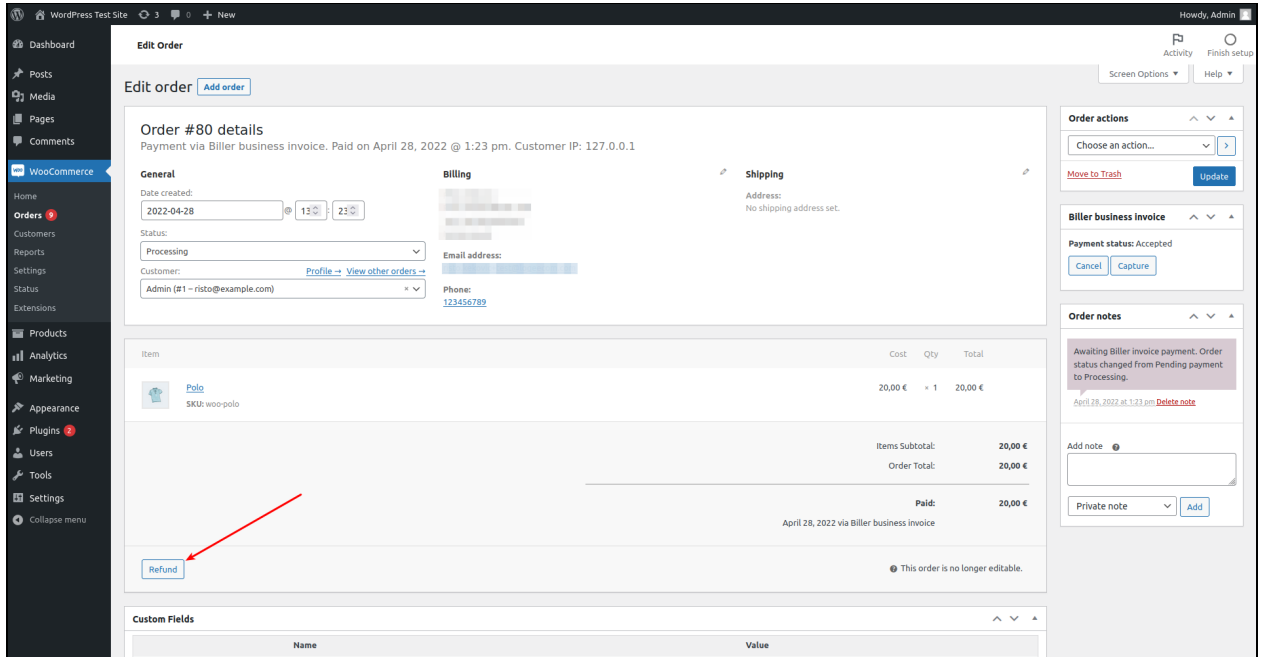

The screenshot shows the 'Edit Order' interface for order #79. The status dropdown menu is open, and the 'Cancelled' option is highlighted. A red arrow points to this option. The order details include:

- General:** Date created: 2022-04-28, Status: Processing (dropdown menu open), On hold, Completed, Cancelled, Refunded, Failed.
- Billing:** Risto Kekovic, Prins Hendrikkade 108, 1011 AK Amsterdam, Netherlands. Email address: risto.kekovic@test@looeecom.com, Phone: 123456789.
- Shipping:** Address: No shipping address set.
- Order actions:** Choose an action... (dropdown), Move to Trash, Update.
- Order notes:** Awaiting Biller invoice payment. Order status changed from Pending payment to Processing. April 28, 2022 at 12:49 pm Delete note.
- Order summary:** Items Subtotal: 45,00 €, Order Total: 45,00 €, Paid: 45,00 €.
- Refund:** A 'Refund' button is visible at the bottom of the order details.

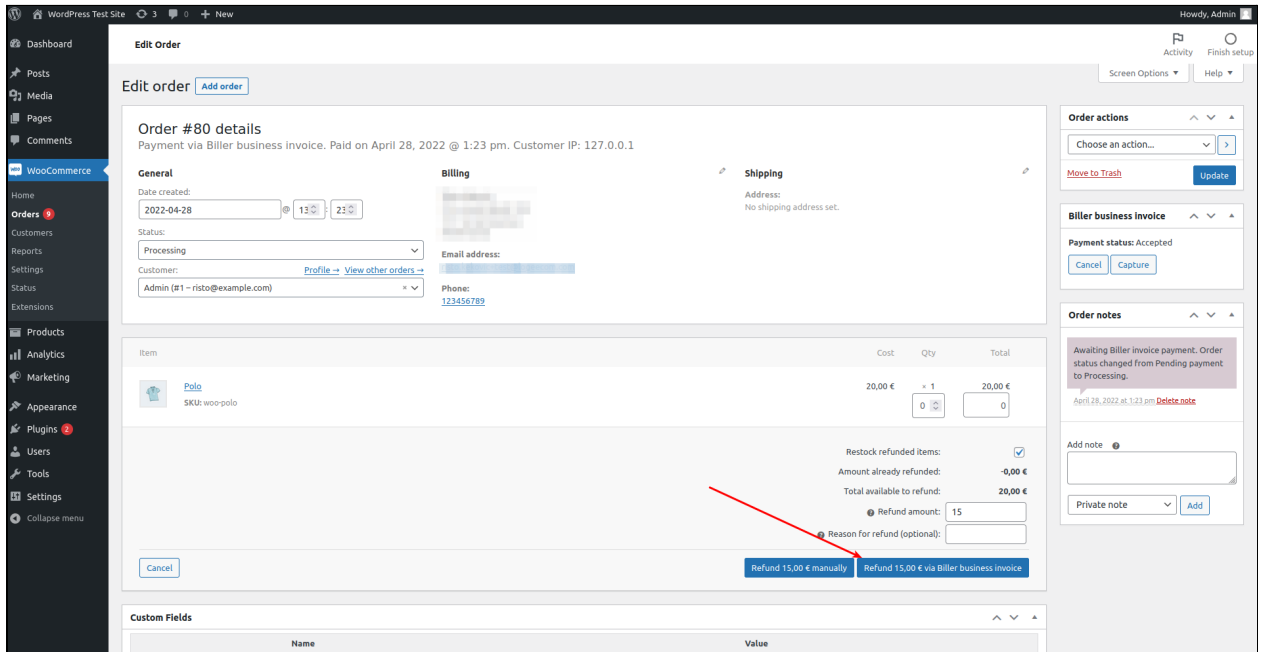

Refund

Biller plugin uses the native WooCommerce refund mechanism for refunding orders. You can refund the order either by line items or by refund amount. The refunds can be either partial or full.

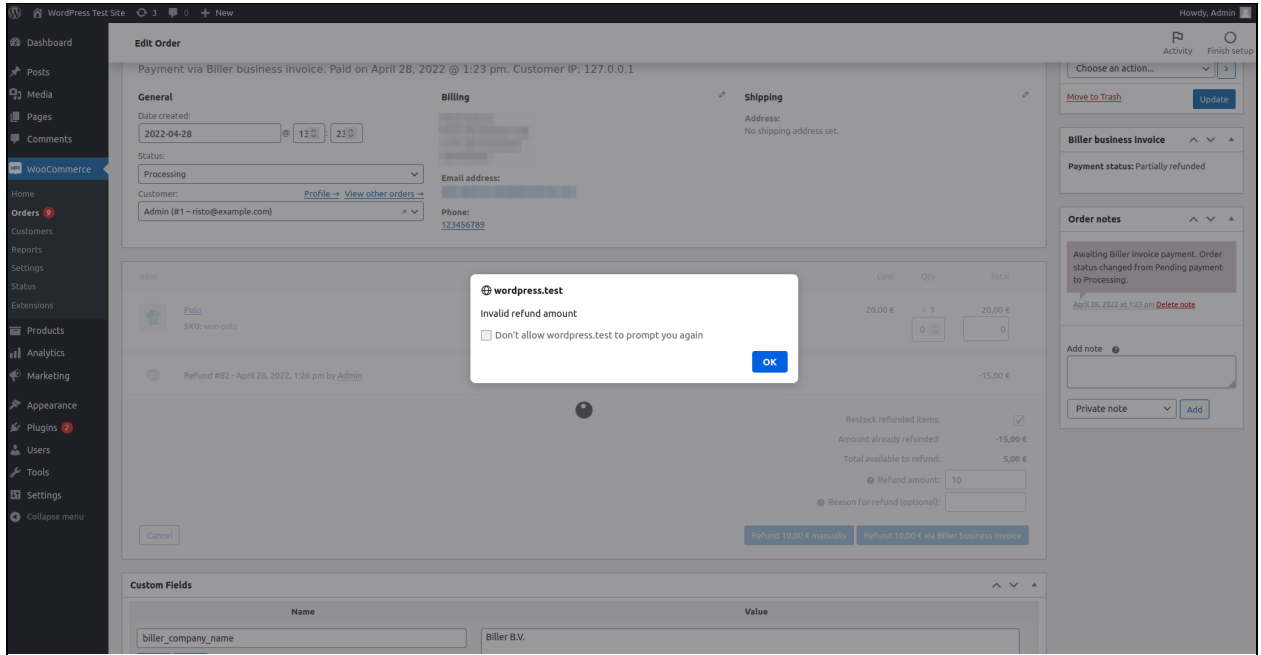

Simply click on the "Refund" button under order line items to refund an order.

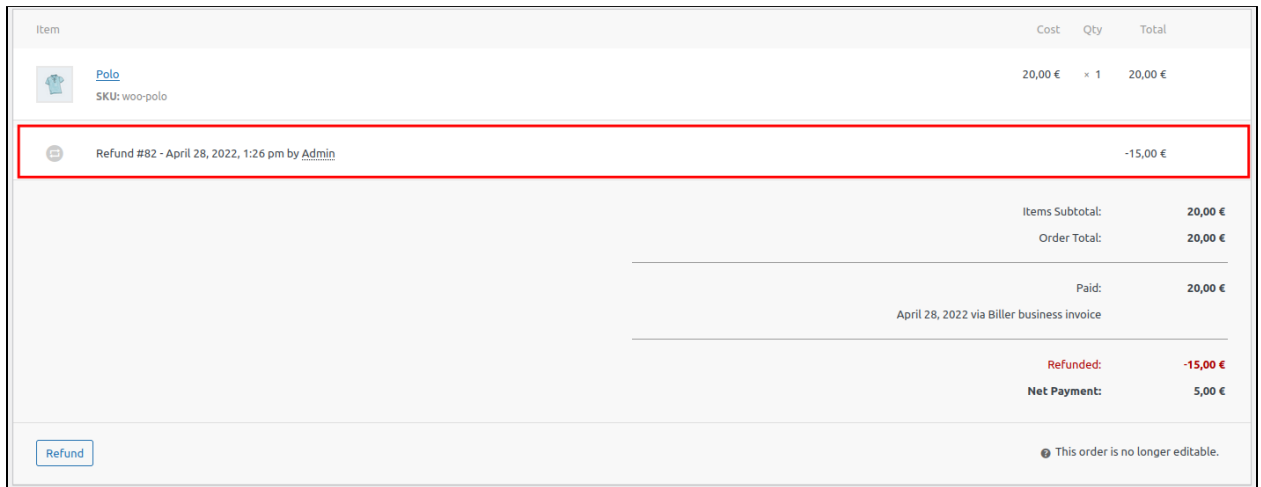

In the section that opens, please click on "Refund via Biller business invoice".

This will attempt to refund the specified amount on Biller. In case refund is refused on the Biller side, it will display the corresponding error message and cancel the refund attempt.

Otherwise, if the refund succeeds, it will display it under order items.

Uninstallation

If you want to uninstall the plugin, you need to deactivate it first and then remove it by clicking on the “Delete” button underneath the plugin's name. Uninstall action will remove all plugin data from the database.

The screenshot shows the WordPress admin interface for a "WordPress Test Site". The left sidebar contains navigation menus for Dashboard, Posts, Media, Pages, Comments, WooCommerce, Products, Analytics, Marketing, Appearance, Plugins (3), Installed Plugins, Add New, Plugin File Editor, Users, Tools, Settings, and Collapse menu. The main content area is titled "Plugins" and shows a list of installed plugins. At the top, it indicates "Plugin deactivated." and provides filters for "All (4)", "Active (1)", "Inactive (3)", "Recently Active (1)", "Update Available (2)", and "Auto-updates Disabled (4)". A search bar for installed plugins is also present. The list includes:

- Akismet Anti-Spam**: Version 4.2.2 | By Automattic | View details. A yellow notification bar indicates a new version (4.2.3) is available.
- Billar Business Invoice**: Version 1.0.0 | By Billar. A red arrow points to the "Delete" button.
- Hello Dolly**: Version 1.7.2 | By Matt Mullenweg | View details.
- WooCommerce**: Version 6.3.1 | By Automattic | View details | Docs | API docs | Community support. A yellow notification bar indicates a new version (6.4.1) is available.

Each plugin entry includes a checkbox, a description, and an "Automatic Updates" status. Bulk actions and an "Apply" button are located at the bottom of the list.
